Website Development: Yellow Pages

Overview

Yellow Pages is an Online Business Directory for people and businesses to connect and get things done.

Requirements

Client needed a Content Management System which can be a scalable website along with a unique Design style. There was a need to keep adding listing & growing the website's content.

.

Solution

EvvoMobility's Solution included the below application development.

- Drupal based content management system for a growing website demand.

- Customised plugin development for advertising, unique search based listing of the ads & businesses.

- Growing directory listing plugin to be integrated to the main website.

- Unique User Experience development of the frontend landing site.

- Create unique flows for the various types of logged in user roles of the site.

- Extend the same technology across to other partner sites.

Technologies Used

- Database: **MySQL**

- Application Framework: **Drupal FrameWork**

- Technology Stack: **PHP**

- Frontend Apps: **Bootstrap & HTML 5**
